

3M™ Quick Fix Adhesive...the “instant bonder” for metal, plastic and rubber.

3M™ Quick Fix Adhesive is a high quality product that dries within seconds after application to form strong, clear bonds on most close-fitting surfaces including metals, plastics and rubber (even EPDM).

You'll find 3M™ Quick Fix Adhesive is ideal for bonding automotive emblems, loose moldings, rubber bumper guards, dashboard trim-almost any area where something needs quick, permanent bonding. A high viscosity cyanoacrylate formula, it resists run-off during application. This unique product also exhibits good resistance to shock, chemicals, solvents, water and high-low temperature extremes.

NOTE: This adhesive does not bond well to untreated polyethylene, untreated Teflon™ or porous materials that allow the adhesive to soak in and away from the glue line.

Ordering information:

Item	Part No.	Size	Items/ Case
3M™ Quick Fix Adhesive	08155	1 oz.bottle (net wt.)	12

Limited Warranty

Buyer agrees that if the product proves to be defective, 3M Company's only obligation shall be to replace or refund the purchase price of such product at 3M's option. Except for personal injury resulting out of the use of products as directed. 3M Company shall not be liable in tort or contract for any loss or damage, direct, incidental or consequential.
